Split AC System Sanitizer

Product Code: AIRSPLIT

Use the sanitizer, breathe fresh clean air

You clean your table, you clean your floor, you clean your bathroom. When was the last time you cleaned the air conditioning unit and vents? What's in the air you're breathing?

Our Split System Sanitizer is specially designed to keep your air-conditioner clean by preventing the growth of mould. Mould growth increases the severity of asthma and can cause nasal congestion, wheezing, chest tightness, coughing and throat irritation.

Stopping mould growth means a cleaner, fresher air for your home or office. Preventing mould means better health for you and your family.

For a complete mould cleaning and maintenance solution:

\$29.70 (includes GST)

1. First, use the Coil Cleaner to clean your Split System.
2. Then place the Split System Sanitizer which will maintain the cleaned machine preventing mould from re-establishing.

Don't put up with dirty, stale, musty air. Clean the air-conditioner and keep it that way. Get a Split System Sanitizer for your air conditioner today!

Features

- Lasts between 4-8 weeks*
- Designed to be compact to fit in any Split System Air Conditioner.
- Lightweight: weighs less than 30g.
- Simple notch-based design means it will only take seconds to use or replace.

Pricing above does not include transport from Sydney to Tasmania
