# impact absorbing Bollards & BumpRails

- Constructed from moulded polyethylene - an incredibly tough material which recovers from low impact and has amazing shock absorbing abilities
- All corners are safely rounded and all fixings concealed
- Bollards protect your doors from unnecessary and costly damage - designed to extend the life of any double-acting traffic door
- Also used for demarcation and protection for walls and doorways
- People friendly and easy to install

simple to install

fully recovers from medium impacts  
greatly reducing costs associated  
with accidental damage

easy to clean

Made from a unique formula which can withstand low temperatures and not go brittle while also withstanding heat and UV rays. It is made from the same compound as roadside guideposts, enabling it to return to its original shape and condition even after heavy impact. The surface has a grooved finish to help hide scratches and blemishes, ideal to protect walls in any trolley traffic area.

# innovative door and barrier systems for hygiene, energy and environment control

## Flexible 'Brid River' PVC Strip Doors

- Hygienic
- Customised to suit your needs
- Simple and fast to install
- Will not rust
- Serial numbered for easy replacement
- Up to 24% energy saving

## 4500 Series Rigid Thermal Traffic Doors

- Features include a rotational moulded polyethylene skin that is high density foam filled and cured to provide exceptional thermal and noise insulation properties
- Double skinned polycarbonate windows are recessed for protection, and provide exceptional visibility
- Full surround seals minimise dust, insect and contaminant intrusion
- The panels have a lightly textured flat surface to ensure a smooth easy passage for trolleys

Movidor high speed doors have been proven to offer clear advantages over conventional rapid doors in 3 key areas:

## FASTER

Smart logic variable speed controllers open the doors at up to 2.5m/sec, reducing energy losses through open doors.

Ultra smooth 3-sided track liners form an impressive seal against air or temperature transfer when the door is closed.

Can be fitted with planar radar detectors to allow for programming.

## SAFER

The Movidor 'soft-edge' curtain design dramatically improves safety by eliminating the bottom weight bar. Optional warning signals can be fitted to the door, that will illuminate 1 second before the door begins to close in automatic operations. Additional safety is provided through a controlled, slow closing sequence.

## SMARTER

With a clean, washable finish, Movidor doors retain their hygienic, smart appearance with minimal maintenance. Larger windows in the curtain provide excellent visibility without compromising on strength.

The structural frame has been strengthened and configured to provide full support for the head unit without load on the wall structure.
