

# ORGANIC GARDEN

Organic farming is about plant health management and disease prevention without the use of synthetic chemicals (pesticides and fungicides). By selling a full range of Mr. Fothergill's Organic Garden seeds you can cater to customers that want to ensure their produce is 100% organic from seed to harvest.

The Mr Fothergill's Organic Garden seed lines have been certified by Australian Certified Organic (formerly Biological Farmers Association) and Southern Cross Certified. Both organisations audit not only the growing methods of the parent plants but also several strict criteria relating to storage and handling.

## Mr Fothergill's Organics Shelf Unit
