ABOUT Vanilla Bean House

The owners of **Vanilla Bean House** themselves lived in Papua New Guinea for 3½ years during 2007-2010 while working on a humanitarian building project. During this time, they were able to train many unskilled locals life and trade skills to better equip them to provide for themselves and their families. They also enjoyed travelling to remote parts of PNG such as Bulolo and Alotau on the main island, and way up north Kavieng on New Ireland, sampling local cuisine.

Vanilla Bean House proudly supports traditional PNG micro farmers living in the lush tropical jungles who support their families and customary extended families. The farmers cultivate vanilla in remote areas free of pesticides and chemical fertilizers. They rely entirely on natural decomposition of coconut husks, banana stumps, fallen debris and animal droppings. In order to sell their beans they literally trek for up to two weeks to reach ‘civilization’ to deliver them to exporters.

Our plump beans range from 16 to 18cm and are **100% organic** A-grade vanilla beans that are highly aromatic and have tones of cherry, fig and anise and full of caviar. What’s more they are packed in sustainable **recycled card** and **home-compostable plastic**.

Our single origin vanilla beans will enhance the flavour of your culinary creations.

Packet of 3 beans
Best Before: Dec 2022

| Code | Product | Margin | RRP | Price Per Packet | Per 10 Packets inc. GST & Tracked Shipping | Order QTY | Total |
