

UNBEATABLE FOG SECURITY

To all IGA Owners:

If you sell cigarettes or have an ATM then I'd like to introduce you to the ultimate defence against theft...

THE PROTECT FOG CANNON

Once activated, the PROTECT Fog Cannon omits a dense fog that is completely harmless to humans, supermarket stock and equipment, leaves no residue and fills the area you want to protect within 15 seconds, leaving it impossible to see what the thieves came for - deterring the theft before it begins.

The PROTECT Fog Cannon is linked to your existing alarm system and is monitored by your alarm monitoring company.

In Tasmania a PROTECT Fog Cannon is installed at David Wilkes' IGA Everyday in Beaconsfield and in Geelong, Victoria at Brendon Goddard's IGA Supermarkets.

You too can have the same peace of mind as David & Brendon, and here's a few reasons why you should consider installing a PROTECT Fog Cannon:

- 1/ Current alarm systems are no deterrent for thieves.
- 2/ Installing a PROTECT Fog Cannon is the best security investment your business can make.
- 3/ A PROTECT Fog Cannon is the only system that can deter any unauthorised entry.
- 4/ Protection in seconds - thieves can't steal what they can't see.
- 5/ The fog is completely harmless and leaves no residue.
- 6/ PROTECT has over 60,000 Fog Cannons installed worldwide.

I look forward to an opportunity to discuss and demonstrate why the PROTECT Fog Cannon is perfect security solution for your business.

Kind Regards,

Peter Hausner, CEO

“ I viewed the PROTECT Fog Cannon at last year's IGA Conference & Trade Expo and was impressed with this new innovative security system.

I thought what a great idea, something to secure my high value cigarettes stock and added protection if thieves decide to attack the ATM from inside the store.

The PROTECT Fog System, like cameras and alarms, has become a critical step in ensuring that if a thief does get in, the fog ensures they 'cannot see what they came for' and that gives me peace of mind.”

- David Wilkes, CEO
IGA Everyday Beaconsfield
